

## On the Subject of Literally Crying

*When people know you for Literally Nothing.*

- This needy module features a sad emoji and a play button.
- In order to deactivate the needy, press the play button to play a random baby insult that will make TracksJo-I mean, the emoji cry to sleep.
- The emoji bends time and space, so there is a barrier around the emoji to prevent it from catastrophic disasters.
- If you do not press the play button, the emoji will cry a river taller than the Nile River, and a strike will be given.
